

Lipitec® HR100

Vegetable rumen protected fat

- Lipitec HR100 is a sprayed fat, developed especially for increased production of milk and butterfat in high yielding dairy cows
- Improves fat content in milk
- Do not contain palmoil
- Lipitec HR100 can be fed in pure form or used in compound feed
- Lipitec HR100 is based on saturated European vegetable oil
- VLOG verified

Analysis:

Crude Fat:	Min. 99 %
Moisture and impurities:	Max. 1 %
Phosphorus (P):	None
Fatty acids, % of crude fat:	Min. 85 %
Iodine value:	max. 2
Melting point:	63° C
Ni-content:	<10 ppm
Color:	light yellow

Fatty acid profile:

C _{14:0} (myristinsyre):	Max. 0,5 %
C _{16:0} (palmitinsyre):	6-10 %
C _{18:0} (stearinsyre):	84-90 %
C _{18:1} (oliesyre):	Max. 3 %
Others:	Max. 3 %

Recommended use:

Lipitec HR100 can be fed directly upon silage or other feed. Max. recommended daily supply for dairy cows:	
0-20 uger post calving:	400 gram
>20 uger post calving:	250 gram

Can be delivered in small bags, big bags, bulk or liquid. Bags are recommended to be closed between use, since product can absorb moisture from humid environment. Keep dry and out of direct sunlight. Expiry date: 1 year from production.
